## Waste Disposal (Top Layers)

In supervised waste disposal sites, Fibertex Geotextiles on both sides of the membranes protect them from perforation. Furthermore, Fibertex Geotextiles are used as filter protection of the drainage layer.

## Waste Disposal (Bottom Layers)

As described with the Top Layers, Fibertex Geotextiles on both sides of membranes protect them from perforation. Fibertex Geotextiles also help to detect leaks.

## Water Purification Systems

Fibertex Geotextiles on both sides of the waterproof membrane protect the system against perforation.
